

SHIKHAR RAJ

Mumbai • shikhar132020@gmail.com • 8433621805 • [Shikhar Raj | LinkedIn](#)

Tech Lead and AI Product Engineer with 3.6 years of experience in full-stack development and AI product engineering. Skilled in building and scaling AI-powered solutions, leading technical teams, managing stakeholder expectations, and driving product execution using JavaScript, React, Node.js, Java, and modern AI technologies. Looking to transition into management and consulting-oriented roles where I can combine technology, leadership, strategy, and business problem-solving to deliver high-impact outcomes.

SKILLS

- **Frontend Development-** JavaScript, TypeScript, ReactJS, React, CSS, Tailwind CSS
- **AI Tools-** Claude, Codex, GitHub Co-pilot, Cursor, Figma MCP
- **Backend Development-** Java, Node.js, MySQL, Postman
- **Data Analytics-** Power BI, Tableau, Excel, and MySQL
- **DevOps and Deployment-** Jenkins, Kubernetes, AWS, Git, Bash scripting, Linux
- **Design Basics:** Knowledge of UI/UX principles and tools like Figma
- **Team Collaboration:** Agile methodologies, JIRA, Scrum practices, Stakeholder and client communication

CERTIFICATIONS

Full stack development(Manipal Global skills academy), DevOps Beginners to Advanced with Projects(Udemy), Deep Learning and Computer Vision A-Z(Udemy), Artificial Intelligence A-Z 2024: Build 7 AI + LLM & ChatGPT(Udemy)

EDUCATION

Bachelor of Eng-Electronics Telecommunication Engineering | University of Mumbai, India

Aug 2018-May 2022

JOB EXPERIENCE

Rock Paper Scissors Studio—Tech Lead & AI Product Engineer(Full Stack Developer)

Oct 2025-Present

- Driving architecture decisions, code reviews, and sprint planning, improving team delivery consistency by 15–20%
- Collaborating closely with designers to deliver pixel-perfect, high-performance UI, reducing UI rework by ~15%
- Delivering multiple client projects in a fast-paced agency environment with ~20–25% faster turnaround time
- Improving development speed using AI-assisted workflows and automation, increasing productivity by ~25–30%
- Translating business requirements into scalable technical solutions, reducing iteration cycles by ~15–18%
- Mentoring team members and maintaining code quality standards, reducing production issues by ~15–20%
- Tech Stack: Angular, TypeScript, React Native, Tailwind CSS, Git, AI tools
- Handling deployments from frontend
- Made pipelines on claude integrated with figma which help to increase productivity and efficiency of development
- Current clients & Projects- Nuvama Wealth & Bajaj

Projects of Clients

Nuvama RTA- Web App for HNI tracking

Bajaj BGIL- Web App for track Insurance for agents and Relationship Managers

Bajaj Insurcraft- Web App for Insurance tracking for customers

Bajaj EKYC-Web App for Ekyc process for customers

Axis Bank , Airoli — Deputy Manager(IT-Full Stack Developer)

Dec 2022 - Aug 2025

Axis Neo (Corporate Banking Platform)

Led frontend and backend delivery across multiple high-impact modules including Payments (Maker/Checker), Payvantage, GIFT City, and NCRP Fraud systems.

Managed cross-functional teams, aligned closely with stakeholders, and ensured smooth execution from requirements to delivery.

- Improved UI interaction and workflow efficiency by 12–33% across key modules
- Led scalable backend development (NestJS) and API integrations, improving performance by up to 36%
- Collaborated with product, design, and business teams to refine user flows and system efficiency
- Drove automation testing initiatives, optimizing CI/CD workflows (Jenkins) and improving testing efficiency by 18%

PROJECTS

Employee Management System — Full Stack

- Developed a full-stack application with **user** and **admin** roles.
- Users registered their details on the login page, stored securely in a **MySQL database**.
- Admins managed employee records with full **CRUD** functionality.
- Backend built using **Java** and **Spring Boot** with a **microservices architecture**.
- Frontend is designed as a **responsive React** application using **JavaScript** and **CSS**.

Bulk Payment Processing System for Retail Customers— Full Stack

- Developed a system to process bulk payments by accepting input files in **configurable CSV/XLSX formats**.
- Integrated a **Template Module**, enabling users to define and manage the expected field order for file processing.
- Backend built using **Java**, and frontend using **React, JavaScript**, and **CSS**.
- Data stored securely in a **MySQL database**.

Green Corridor and adaptive traffic regulation using machine learning and Image processing (Final year Engineering

- Designed a system to **regulate traffic and create a green corridor using machine learning models and image processing**.
- The system adapts traffic signals in **real-time to optimize traffic flow and create green corridors for emergency vehicles**.
- **Object detection** was implemented using **YOLOv4** for detecting vehicles.
- Utilized **Python** for machine learning, with libraries such as **OpenCV, sklearn, pandas, matplotlib, and numpy** for data processing and model building.
- The project was selected by **CIIA (Institution's Innovation Council, MHRD, Govt. of India)** as an innovation model.
